SHFAQJA E FAQEVE

Shtohen web faqet qe do te shfaqen ne pjeser e frameset permes atributit src.

Po ashtu ju mund te emertoni secilen pjese te frameset permes atributit name.

Kjo na lejon qe te krijojme nje link ne nje frame qe kur klikojme te hapet faqja perkatese ne frame tjeter.

In addition we have assigned the names menu and main to the two frame windows, so now we're even able to link to specific windows.
Emrat e frameve jane menu and main, por mund te emertohen sipas deshires.
